2011-2017

Eskilstuna, SE

VOLVO CONSTRUCTION EQUIPMENT

Chief Project Manager, August 2011-November 2017

Responsible for leading global product development programs within Volvo CE. The projects included: Next Generation of Electromobility hybrid Wheel Loaders, development of new hardware and software platforms, new applications and a new generation of transmissions for Construction Equipment machines.

2001-2011

Västerås, SE

BOMBARDIER TRANSPORTATION

Manager Project Procurement, April 2008-July 2011

Manager for the Project Procurement department at the Propulsion and Control division.

Responsible for the material scope in our delivery projects, as well as being part of the bid team with responsibility of the material cost. We handled approximately 30 active projects in parallel. The project value varied between 5 MEUR and 400 MEUR and the material cost was typically 50-60% of the total project value.

Manager Organizational Development and Six Sigma, April 2005-March 2008

Responsible for the Six Sigma program/department within the Propulsion and Control division in Sweden. This included driving improvement initiatives and training employees in Six Sigma methodology.

As part of the Site Management Team, I was also working with strategic planning and development within the division.

During this period I was also acting Division Quality Manager for the Propulsion and Control division during six months, taking the overall responsibility for Quality Assurance at the Västerås site.

Senior Program Manager, May 2003-March 2005

I was in charge of several projects to the UK where Bombardier Sweden were delivering the propulsion and control system to 404 trains with a total value of 300 MEUR.

Senior Project Manager, June 2001-April 2003

Responsible for a tram project to Turkey (Istanbul) where Bombardier Sweden were delivering the propulsion and control system for 55 trams with a total value of 22 MEUR.
